data from POWER TRANSMISSION DESIGN

1960 Editorial Index

POWER TRANSMISSION DESIGN

. Drives & Controls

. Components

. Lubrication

BALL SCREWS		Page
Pivoting Leadscrew Produces Adjustable Stroke	Feb.	28
BEARINGS		
New Aluminum Sleeve Bearings--for High Loads and Speeds	Jan.	56
Bearing Standardization--Do Your Engineers Really Know Bearings?	Feb.	48
Bearing Noise is Often Louder Than You Think	Mar.	62
Bearing Change Stops Planetary Gear Troubles	Apr.	44
Mount Bearings Carefully--Stop the No. 2 Cause of Failure	Apr.	40
Bearing Eliminates Turntable Accessories	May	28
Determining Bearing Loads Due to Power Transmission	May	48
Planned Obsolescence. . . How It Affects Power Transmission System Design	May	25
Differential Gear Case Redesign Improves Lubrication	June	34
How to Decide Which Type Bearing to Use	June	46
How to Select Grease for Bearings	June	42
New Ball Standards	July	52
New Gas Bearing Design Gives Increased Load Capacity	July	54
Determining Bearing Loads	Aug.	40
How to Prevent Bearing Failure	Sept.	44
Bearing Mounting Design	Oct.	48
Unlubricated Plastic Bearings	Nov.	41
Metallizing Gives Worn Parts New Life	Dec.	31
Tough, Stable Ceramic Bearings Give Gyro High Accuracy	Dec.	48

BELT DRIVES

		Page
Multi-rib Belt Eliminates Vibration	Jan.	39
Nomogram for Mounting Pivoted Motor, Base and Accessories	Feb. Mar. Apr.	56 78 36
Determining Bearing Loads Due to Power Transmission	May	48
Stationary V-Belt Drives Agitators	May	27
Wide-Range V-Belt Drives Flat Pulley	May	32
Master/Slave Drives Control Precise Batching	June	33
Flat Belt Takes Shock Loads Without Slip	July	42
Toothed Belt Drive Helps Save $57,000	July	38
Compact V-Belts Handle High Inertia	Aug.	26
Direct Drive Eliminates Backlash	Aug.	33
Simple Turntable Design Proves Best	Aug.	28
Automatic Speed and Feed are Infinitely Variable	Sept.	40
Infinitely Variable Speed by Belt or Direct Drive	Sept.	40
Low-Maintenance Belt Drive is Simple and Efficient	Sept.	33
O-Ring Drive Transmits Power Smoothly	Sept.	32
Redesigned Drive, Motor Mount Give Low-Maintenance Operation	Sept.	28
Tape-Controlled Jig Borer has V-Belt Spindle Drive	Sept.	32
Variable-Speed Drive Helps Boost Production	Sept.	36
Overrunning Clutch, Electric Clutch Coordinate Multi-Speed Belt Drive	Oct.	42
Polymer Belts Pass Torture Tests	Oct.	41
Toothed Belts Double as Conveyor Belts	Oct.	39
Compact V-Belts Reduce Bearing Overhang	Nov.	38
Metal Belts Cut Energy Losses	Dec.	36

CHAIN DRIVES		Page
Eddy-Current Couplings Keep Cable Tension Constant	Jan.	40
Electric Controlled Air Clutches Select Speeds Automatically	Jan.	44
DC Drive Keeps Cable Pull Smooth	Feb.	37
Individual Drives Stop System Shutdown	Feb.	35
Electrical Drives on Rear Wheels Increase Traction	Mar.	42
Shaft-Mounted Reducer Permits Easy Access	Mar.	48
Determining Bearing Loads Due to Power Transmission	May	48
Planned Obsolescence. . . How It Affects Power Transmission System Design	May	25
Roller Chain is Quieter Than Gears for Transmission	May	34
Master/Slave Drives Control Precise Batching	June	33
Flat Belt Takes Shock Loads Without Slip	July	42
Direct Drive Eliminates Backlash	Aug.	33
Bevel Disks Reverse Fan on 2-Way Snowthrower	Dec.	45
Tiller Drive Combines Power, Safety	Dec.	40
CLUTCHES & BRAKES		
Cylinder Actuates Clutch and Brake Inside Gear Box	Jan.	42
Eddy-Current Couplings Keep Cable Tension Constant	Jan.	40
Electric Controlled Air Clutches Select Speeds Automatically	Jan.	44
Overrunning Clutch Inside Gear Eliminates Gear Box Shock	Feb.	40
Floating Gears Up Rating to 1000 Hours	Apr.	24
Overrunning Clutches Make Front Wheel Drive Automatic	Apr.	26
Properly Installed Drive Components Increase Engine Life	Apr.	28
Friction Clutches and Brakes	June	19

(Clutches & Brakes cont'd next page)

		Page
Vacuum Capstan Drive is Instant Start-Stop	June	36
Friction Clutch Responds to Slightest Tension	July	35
Full-Floating Flywheel, Low-Inertia Clutch Take Strain Off Driveshaft	July	33
Positive Contact Clutches & Brakes	July	27
Air Clutches Accomodate Shaft Elongation	Aug.	23
Compact V-Belts Handle High Inertia	Aug.	26
Direct Drive Eliminates Backlash	Aug.	33
Stops Clutch Action Within .0003 in.	Aug.	24
Variable-Slip Clutch Keeps Load Constant	Aug.	32
Clutch Combinations Change Spindle Speeds	Sept.	38
Interlocked Controls Give Motorized Ram Versatility	Sept.	36
One Clutch, One Motor Give Four Speeds	Sept.	37
Coaxial Headstock Delivers Top Horsepower, Smoothness	Oct.	44
Disks Keep Shift Time Constant in Transmission Synchronizer	Oct.	28
Overrunning Clutch, Electric Clutch Coordinate Multi-Speed Belt Drive	Oct.	42
Air Clutches Pay 500% Dividend	Nov.	37
Dry-Fluid Coupling Absorbs Shock Loads	Dec.	42
Tiller Drive Combines Power, Safety	Dec.	40

CONTROLS

Direction/Speed Control Simplifies Drive	Aug.	29
Stops Clutch Action Within .0003 in.	Aug.	24
Interlocked Controls Give Motorized Ram Versatility	Sept.	36

ENGINEERING CALCULATIONS		Page
Nomogram of Shaft Torque, HP and RPM	Jan.	62
Nomogram of Hydraulic Motor Torque	July	48
Nomogram of Hydraulic Pump or Motor Hp	July	47
Determining Bearing Loads	Aug.	40
ENGINES		
Diesel Engine Improves Ground Power Unit	Jan.	46
Properly Installed Drive Components Increase Engine Life	Apr.	28
FLUID COUPLINGS & TORQUE CONVERTERS		
Fluid Coupling Lets 3 HP Motor Drive 23 Tons	Mar.	46
Properly Installed Drive Components Increase Engine Life	Apr.	28
Torque Converter-Gearbox Combination is Versatile Tractor Drive	May	30
Fluid Couplings and Torque Converters	Aug.	15
FRICTION DRIVES		
Bevel Disks Reverse Fan on 2-Way Snowthrower	Dec.	45
GEAR DRIVES		
Cylinder Actuates Clutch and Brake Inside Gear Box	Jan.	42
Electric Controlled Air Clutches Select Speeds Automatically	Jan.	44
Put Your Power Where The Work is--With a Gearmotor	Jan.	20
Speed Reducer Ups Efficiency to 97%	Jan.	43
The Case for Honed Gears: Specify "Honing" on Drawings--and Gear Noise Will Practically Vanish	Feb.	24
How To Select and Use Gearmotors and Motorized Reducers	Feb.	18
Individual Drives Stop System Shutdown	Feb.	35

(Gear Drives cont'd on next page)

		Page
Overrunning Clutch Inside Gear Eliminates Gear Box Shock	Feb.	40
Pivoting Leadscrew Produces Adjustable Stroke	Feb.	28
Fluid Coupling Lets 3 HP Motor Drive 23 Tons	Mar.	46
Shaft-Mounted Reducer Installations up 103% in 5 Years	Mar.	32
Specify Enclosed Gearing -- For Highest Efficiency and Longest Life	Mar.	20
Electrical Drives on Rear Wheels Increase Traction	Mar.	42
Shaft-Mounted Reducer Permits Easy Access	Mar.	48
Auxiliary Hydraulic Drive Steers Paver	Apr.	19
Bearing Change Stops Planetary Gear Troubles	Apr.	44
Floating Gears Up Rating to 1000 Hours	Apr.	24
Overrunning Clutches Make Front Wheel Drive Automatic	Apr.	26
Quick-Change Gearbox Stores Spare Gear Pair	Apr.	34
Special Coupling Lets Crane Drive Rail Car	Apr.	22
Determining Bearing Loads Due to Power Transmission	May	48
Planned Obsolescence . . . How It Affects Power Transmission System Design	May	25
Roller Chain is Quieter Than Gears for Transmission	May	34
Torque Converter-Gearbox Combination is Versatile Tractor Drive	May	30
Cruciform Transmission Flies VTOL Craft	June	31
Differential Gear Case Redesign Improves Lubrication	June	34
Master/Slave Drives Control Precise Batching	June	33
Self-Locking Drives Simplify 2-Axis Positioning	June	38
Flat Belt Takes Shock Loads Without Slip	July	42
One Shaft Drives 78 Gears	July	36
Direct Drive Eliminates Backlash	Aug.	33
Direction/Speed Control Simplifies Drive	Aug.	29

(Gear Drives cont'd on next page)

		Page
How Production Affects Gear Design	Aug.	34
Quick-Change Gears are Totally Enclosed	Aug.	30
Simple Turntable Design Proves Best	Aug.	28
Clutch Combinations Change Spindle Speeds	Sept.	38
One Clutch, One Motor Give Four Speeds	Sept.	37
Coaxial Headstock Delivers Top Horsepower, Smoothness	Oct.	44
Diagonal Drive Simplifies Power Train	Oct.	43
Differential Synchronizes Work, Tool Speeds	Oct.	45
Disks Keep Shift Time Constant in Transmission Synchronizer	Oct.	28
The F-106 Constant-Speed Generator Drive	Oct.	23
Gear Train Eliminates Valve Noist	Nov.	36
Dry-Fluid Coupling Absorbs Shock Loads	Dec.	42
Geared Headstock Provides 12 Speeds	Dec.	38
Metallizing Gives Worn Parts New Life	Dec.	31
Speed Reducers in Unusual Crane Drive	Dec.	35

HYDRAULIC DRIVES

Hydraulic Drives Simulate Road Loads	Jan.	48
Rotary Actuator Develops 20 Ton-Ft. Torque	Feb.	43
Servo Motor Controls Hydraulic Positioning	Mar.	39
Auxiliary Hydraulic Drive Steers Paver	Apr.	19
Hydrostatic Variable-Speed Transmissions	May	19
Nomogram of Hydraulic Motor Torque vs. Pressure	May	56
Nomogram of Hydraulic Pump or Motor Speed vs. Flow Rate	May	54
Nomogram of Hydraulic Motor Torque	July	48
Nomogram of Hydraulic Pump or Motor HP	July	47
The F-106 Constant-Speed Generator Drive	Oct.	23

LUBRICANTS, LUBRICATION SYSTEMS, LUBRICATION DEVICES		Page
Cruciform Transmission Flies VTOL Craft	June	31
Differential Gear Case Redesigr Improves Lubrication	June	34
How to Select Grease for Bearings	June	42
MECHANICAL ADJUSTABLE SPEED DRIVES		
Nomogram for Mounting Pivoted Motor, Base and Accessories	Feb. Mar. Apr.	56 78 36
Overrunning Clutch Inside Gear Eliminates Gear Box Shock	Feb.	40
Variable Speed Permits Broader Die Use	Feb.	42
Quick-Change Gearbox Stores Spare Gear Pair	Apr.	34
Roller Chain is Quieter Than Gears for Transmission	May	34
Torque Converter-Gearbox Combination is Versatile Tractor Drive	May	30
Master/Slave Drives Control Precise Batching	June	33
Automatic Speed and Feed are Infinitely Variable	Sept.	40
Low-Maintenance Belt Drive is Simple and Efficient	Sept.	33
Redesigned Drive, Motor Mount Give Low-Maintenance Operation	Sept.	28
Tape-Controlled Jig Borer Has V-Belt Spindle Drive	Sept.	32
Variable-Speed Drive Helps Boost Production	Sept.	36
Disks Keep Shift Time Constant in Transmission Synchronizer	Oct.	28
The F-106 Constant-Speed Generator Drive	Oct.	23
Overrunning Clutch, Electric Clutch Coordinate Multi-Speed Belt Drive	Oct.	42
New Ball-Galaxy Transmission Does High-Torque Work Efficiently	Nov.	33
Geared Headstock Provides 12 Speeds	Dec.	38

		Page
MOTORS & ELECTRICAL ADJUSTABLE-SPEED DRIVES		
Eddy Current Couplings Keep Cable Tension Constant	Jan.	40
Electric Controlled Air Clutches Select Speeds Automatically	Jan.	44
Put Your Power Where The Work Is---With a Gearmotor	Jan.	20
DC Drive Keeps Cable Pull Smooth	Feb.	37
How To Select and Use Gearmotors and Motorized Reducers	Feb.	18
Individual Drives Stop System Shutdown	Feb.	35
Electrical Drives on Rear Wheels Increase Traction	Mar.	42
Servo Motor Controls Hydraulic Positioning	Mar.	39
Electric Lift Truck Drive Has Long Life, Saves Fuel	Apr.	17
Telescopic Motor Shafts Drive Coal Mining Rippers	July	40
Infinitely Variable Speed by Belt or Direct Drive	Sept.	40
Are Printed Circuit Motors Practical?	Oct.	32
AC Motor Selection - Part I	Nov.	19
AC Motor Selection - Part II	Dec.	17
PARTIAL ROTATION DEVICES		
Rotary Actuator Develops 20 Ton-ft Torque	Feb.	43
PNEUMATIC DRIVES		
Air Motors Give Compact, Efficient Drive	Dec.	34
SEALS & GASKETS		
New Oil Seals Work Well on Rough Shafts	Mar.	66
Rotary Shaft Seals	Sept.	15
SHAFTS, SHAFT COUPLINGS & UNIVERSAL JOINTS		
Nomogram of Shaft Torque, HP and RPM	Jan.	62
Rubber Bushings Stop Universal Shaft Breakage	Mar.	44
Displaced Universal Joints Stops Drive Shaft Vibration	Apr.	32

		Page
Special Coupling Lets Crane Drive Rail Car	Apr.	22
Telescopic Motor Shafts Drive Coal Mining Rippers	July	40
The F-106 Constant-Speed Generator Drive	Oct.	23
